## Content Security Policy Configuration

### Description

Content Security Policy (CSP) is an added layer of security that helps to detect and mitigate certain types of attacks, including Cross Site Scripting (XSS) and data injection attacks.

### Vulnerability found in /

Description	HTTP Request	cURL command line
CSP is not set		

### Solutions

Configuring Content Security Policy involves adding the Content-Security-Policy HTTP header to a web page and giving it values to control what resources the user agent is allowed to load for that page.
